Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's arguments filed 3/17/03 have been fully considered but they are not persuasive. Claims 1-39 are under consideration by the examiner.

Information Disclosure Statement

Applicant is reminded of their duty to disclose all information which is known to them to be material to patentability of the instant claims.

Specification

The amendment filed 3/17/03 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The change to page 24, lines 17-21, is not supported. Application number 09/745,965 does not correspond to Docket Number 3373 and was not filed concurrently with the instant application.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

Claims 1-39 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. This is an enablement rejection.

This rejection is maintained for reasons of record. It is maintained that the claims do not reflect the particular steps and multiple linear regression models used in the examples to achieve

Art Unit: 1631

the goal of selecting oligonucleotide probes and no guidance is provided on other computer implemented methods for selecting oligonucleotide probes. The examples in the specification fail to provide sufficient information or guidance to permit one of ordinary skill in the art to reproduce them. Applicant's arguments generally concern particular aspects of the invention disclosed in the specification which are not a limitation of the claims. The arguments do not address the inability of one of skill in the art to practice the invention as presently claimed without undue experimentation due to the lack of guidance and the inability to reproduce the examples in the specification.

The model for probes of N bases in length set forth on page 19, following equation 8, remains confusing. Note that the subscripting notation does not correspond to the expansion of the summation in equation 8. While applicant has corrected $\text{Ln}(I_I)$ to $\text{Ln}(I_M)$, the remainder of the last line continues to refer to "I" and not "M." See page 10 of the response.

It is again noted the various co-pending applications referenced are not issued or allowed U.S. applications and thus cannot be properly incorporated by reference. As such, applicant may not rely upon their disclosures to enable the instant invention.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 1631

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
